the shredz cellulose advantage

The past, present, and future of green building technology

Made from 85% recycled paper, Shredz is the purest, cleanest, and greenest cellulose product on the market. Offering better coverage and a higher R-value per inch than other insulation products, Shredz delivers more with less, saving you time and money from the get-go.

Extreme coverage. Shredz products blow efficiently and with reliable and consistent coverage.

No product waste. With Shredz insulation, there's no wasted product—meaning you'll get all of the product, all of the time.

Fast & efficient. Our cellulose insulation fills every nook and cranny without cutting and fitting, increasing job productivity and task efficiency.

Retrofit with ease. Shredz can be blown over existing insulation without removing the old, letting you reach the necessary R-value with less product, in less time.

the shredz home: a different shade of comfort

With the best and broadest lineup in the industry, Shredz brings quality, comfort, and performance to every job, every time. Count on happier customers, quieter homes, easier install, and faster turnaround.

Happy clients. Higher quality standards and consistent quality product performance keep clients happy and your reputation pristine.

Scrupulous quality control. We screen our products and adhere to high quality standards to bring you a consistently clean product.

Increased comfort of living. Our cellulose insulation offers superior climate control, keeping you cool in the summer and warm in the winter—Mother Nature watch out.

Superior noise reduction. Shredz absorbs noise for a quieter home.

Clean, green, pure. Non-toxic, non-corrosive, and non-irritating, Shredz is safe for applicators, DIYers, and the environment.

sustainable savings that last a lifetime

One & done. Install once. Save for life.

Energy savings. Shredz seals around plumbing and electrical outlets to create an airtight barrier that can slash heating and cooling costs by up to 20%.*

Cleaner and greener than the competition. Shredz is made from 85% recycled paper.

85%
recycled paper

*Savings may vary. Higher R-values mean greater insulating power.

peace of mind, guaranteed

With a Class 1 fire rating, Shredz knows how to keep you safe. All of our products are treated with fire retardants to meet federal, state, and local requirements; have a very low smoke development index level; and help control flame spread to make every second count.

Class 1 material. Shredz has earned a Class 1 fire rating as determined by ASTM-E84.

Flame retardant. Our cellulose insulation is treated with safe fire retardants to conform with Customer Product Safety Commission (CPS) standard 16CFR 1209 and 1404.

Meets requirements. Shredz products are classified in accordance with ASTM-C739.
