

# LONG LASTING VAC

Engineered for high productivity, and built-to-last for high value generation.

- Minimized Engine Stress - high production impeller positioned on its own shaft and activated by a centrifugal clutch.
- A built in vacSHIELD to capture foreign objects from damaging the vacuum impeller, shroud or engine and exiting at high speeds.
- Vanguard 23 Hp V-Twin
- Like the Turbovac, debris flows through the heavy 1/4 inch abrasive resistant steel shroud and past the 1/4 inch thick abrasive resistant impeller.

#TURBOVACENDURA

## Specifications

- Weight – 435 pounds
- Inlet/Outlet – 6 inches w/optional 8 inch
- 10 inch Run Flat Tires
- Vanguard V-Twin Engine w/electric start
- 23 hp
- Fuel Tank – 5 Gallon – Gasoline

## Warranty

- Engine – 36 Months
- Components - 12 Months
